WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Corner pieces (4): 150 mm of 30 x 30 x 3 aluminium angle; one leg covers the end of the side board and the end board's face, the other the side board's face.

Two 6.5 mm holes in each leg at 50 and 100 mm up, drilled through the boards' corner holes with the piece clamped on.

Board brackets (10): 40 mm of the same angle; one 6.5 mm hole in each leg, 15 mm from the corner, centred.

Fit: bracket flat leg on the deck, bolted down through the deck into a frame rivet nut; upright leg on the board's inside face with an M6 bolt and wing nut. Corner pieces: M6 bolts with wing nuts through both boards.

To take a board off: undo its wing nuts and lift it.

Flag pole: 12 mm pole in two clips on the left board's inside face, 30 mm behind the front board, at 40 and 120 mm up.

Deburr every cut edge.
