WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Box 350 long x 300 wide x 170 tall, folded from 0.8 mm galvanized sheet, seams riveted and sealed. Closed top.

Front face (toward the drawbar): door opening 280 x 163 mm, centred, from the floor up; the pack slides out through it.

Door: 292 x 166 mm with 11 mm folded sides, hinged along its bottom edge, a keyed lock at the top, a foam gasket.

Top: four 6.5 mm holes 15 and 335 mm from the front face, 100 mm each side of centre, with a 1.5 mm steel doubler strip inside under each pair.

Vent low on the rear face, pointing down and away from the load; cable glands on the left, right and rear faces.

Fit: four M6 bolts from inside, up into the rivet nuts in the crossmembers, with large washers.

Check: the pack slides in and out with the door open.
